

CLIMBSKIN

Hand Cream **your skin in your hands**

Official Supporter of the Spanish National Teams of Climbing and Paraclimbing

About Us

YOUNG ENTREPRENEURS

Climbskin® is a young company created by a group of friends, all of us lovers of nature and sports, particularly of climbing in all its disciplines and branches. In our wish to overcome the limitation caused by the hands skin damage, we decided to pool our knowledge to create Climbskin® Hand Cream.

We have a Ph.D. in Chemistry, a Biologist with over ten years of experience in the manufacture of cosmetics, a nature-based health Physician and above all many years of climbing among friends.

WE OFFER A NOVEL AND MAXIMUM QUALITY PRODUCT

Climbskin® Hand Cream is the result of a hard but rewarding work, a wall difficult to be crowned but with great views from its top. Climbskin Hand Cream® is a unique product.

"We are proud of the product we offer, and believe you will enjoy it as much as we already do".

"It's gonna change people's climbing"

Chris Sharma.

CLIMBSKIN.COM

In our hands.

Corporate Social Responsibility

Respect for nature and the environment have been and will be companions on this journey, in fact we make a pledge to donate 1% of our sales to partnerships that promote sustainable climbing or to associations that really inspire all of us like Climbers Against Cancer that we are proud to support.

D Description

FOR ALL SKIN TYPES

Climbskin® Hand Cream is designed by climbers for climbers, but also for people who need extra care of their hands. Climbskin® Hand Cream is a fast-absorbing cream.

REGENERATES, HEALS, HYDRATATES AND CALMS

Climbskin® Hand Cream contains the most potent skin regenerative agents found in nature, in a new and precise formula with eight major components: Dragon's Blood, Tincture of Benzoin, Centella Asiatica, Shea Butter, Achillea Millefolium, Buckthorn Oil, Aloe Vera and Rosehip Oil. Climbskin® Hand Cream achieves exceptional deep hydration and has a great calming effect on the skin.

MAXIMUM QUALITY INGREDIENTS

Its balanced combination of high quality extracts and oils in an exceptionally thin matrix confer it a dense texture, not oily even at high temperatures. It does not contain artificial colors or flavors, only ingredients of the best quality, whose combination yields a pleasant aroma, natural and characteristic.

S Supply

The cream is sold in plastic containers of 30 ml (1.01 oz) with a safe sealing and a screw cup.

Dimensions:

5,1 x 5,1 x 3,6 cm (approx. 2 x 2 x 1,4 inches)

Weight:

2,43 oz (69 G)
(net weight: 1.01 oz / 29 g)

Climbskin® Hand Cream

Is an emulsion, i.e., it contains ingredients soluble in oil such as high quality Shea butter, Buckthorn and Rosehip Oils, but also ingredients soluble in water such as Aloe Vera, Tincture of Benzoin, Dragon's Blood, extract of Centella Asiatica and Aquileia Millefolium, components that contribute with their exceptional properties but cannot be properly incorporated in wax-based products.

The skin absorption and penetration of Climbskin® Hand Cream is much higher than wax-based products, so there is a deeper hydration, better regeneration and less residues.

Excessive superficial hydration is counterproductive to heal wounds and cracks, a factor that waxes cannot control easily.

Climbskin® Hand Cream contains Tincture of Benzoin and natural silica, components that, besides their intrinsic properties, regulate sweating, a very limiting factor in the wax-based products.

Comparison with Wax-based Products

Warranty & Tests

© 2015 Carrascoia

The manufacturer registration number appears at the bottom of the container (NRI 00523-CS). We produce under GMP (good manufacturing practice in accordance with ISO 22716). Climbskin® Hand Cream is registered with CPNP, the European portal where, according to the new regulation 1223/2009, all cosmetics must register in the European Union.

Patch Test: 0% skin irritability.

Challenge Test: This microbiological test evaluates if the cream undergoes over time any modification by pathogens (fungi and bacteria). Climbskin passed this test with 100% effectiveness.

Stability Test: This test examines the cream performance in a broad range of temperature, from -10°C to 45°C (14°F /113°F). Climbskin® Hand Cream proved to be fully efficient within 3 years before opening, and within 6 months after opening.

Not tested on animals. 100% Vegan.

Reviews & Comments

"It is a great product, it moisturizes and rebuilds your skin. It is not like the waxy or oily materials, you can actually put it on before you climb which is one of the most amazing things. Climbskin is gonna change people's climbing. It is by far the best product on the market". — **Chris Sharma**

Apply Climbskin Hand Cream 1 hour before climbing. Unlike other products, this is possible thanks to its quick absorption. A proper hydration gives the skin more elasticity, reducing the chances of any further damage, such as smilies, cracks or opening calluses. Tincture of benzoin and natural silica also help to regulate sweating, which is an important factor in skin wear.

Spanish Federation of Mountain Sports and Climbing (FEDME):

"The cream has complied with the expectations generated. The Spanish Teams of Climbing value very positively its use." Conclusion of the Climbskin test by the Spanish Team of Climbing conducted in April 2013 (testers: Toni Roy, Edu Marin and Ramón Julian).

Atate:

"A wonderful product that I recommend to everyone. Now we can climb for several days in a row! It magically soothes and regenerates the skin."

8a.nu:

"Climbskin is an excellent hand cream to regenerate damaged skin, which is the main problem when we overdo our sport. The sense of relief in the sore hands is brutal."
